WASTE HEAT RECOVERY UNITS

IHT's Waste Heat Recovery Units feature plate fin and tube coil modules which are ideally suited for heat recovery from low-pressure waste streams such as gas turbine exhaust.

Features include:

- Low Gas Side Pressure Drop
- Low Gas Side Fouling Potential
- High Performance
- Compact Size
- Low Weight
- High Temperature Capability (up to 1100 F)
- ASME Code Stamp

The pictured Waste Heat Recovery Unit is shown at shipment (below) and during installation (right). The compact design can be easily transported. The modular construction simplifies field installation.
